

SHREDDER WTS 300
Universal twin shaft shredder

WAGNER SHREDDER WTS 300

Universal twin shaft shredder

Economic shredding:

- All types of plastic
- Biological and liquid waste
- Electronic waste / metal shavings / oil filters
- Paper / wood
- Production and industrial waste
- Plastic and metal containers, etc.

Drive: proven and powerful

- Robust high-quality helical gear unit with drive withdrawal sleeve
- The gear unit has rubber bearings
- Low-maintenance and low-inertia drive by means of two gear units, resulting in constant cutting shafts torque.
- Less wear, less dust, less noise

Machine housing: sophisticated and robust

- Compact, solid bolted construction
- The self-aligning roller bearings are protected against dirt and liquids by means of a bulkhead and additional seals
- The shafts can be replaced completely, quickly, and easily

Cutting discs: high quality and availability

- Several cutting geometries, thicknesses, and material grades are available
- The material is shredded effortlessly due to the precise cutting gap of the individually mounted knives

Control system: innovative and sophisticated

- User-friendly, quick selection of the various work programs by pressing a button on the display
- Increased throughput due to the high-performance, intelligent activation of the separate drives
- Overload protection of the cutting shafts
- Display of status notifications on the display
